Air Care

North Memorial Health delivers remarkable medical care on the ground and in the air. North Memorial Health Air Care often responds directly to the scene of an emergency, providing helicopter transport for customers to the closest appropriate medical care facility. We can respond 24/7 to medical flight transportation service calls throughout Minnesota, areas of Wisconsin, Iowa and the Dakotas.

Services

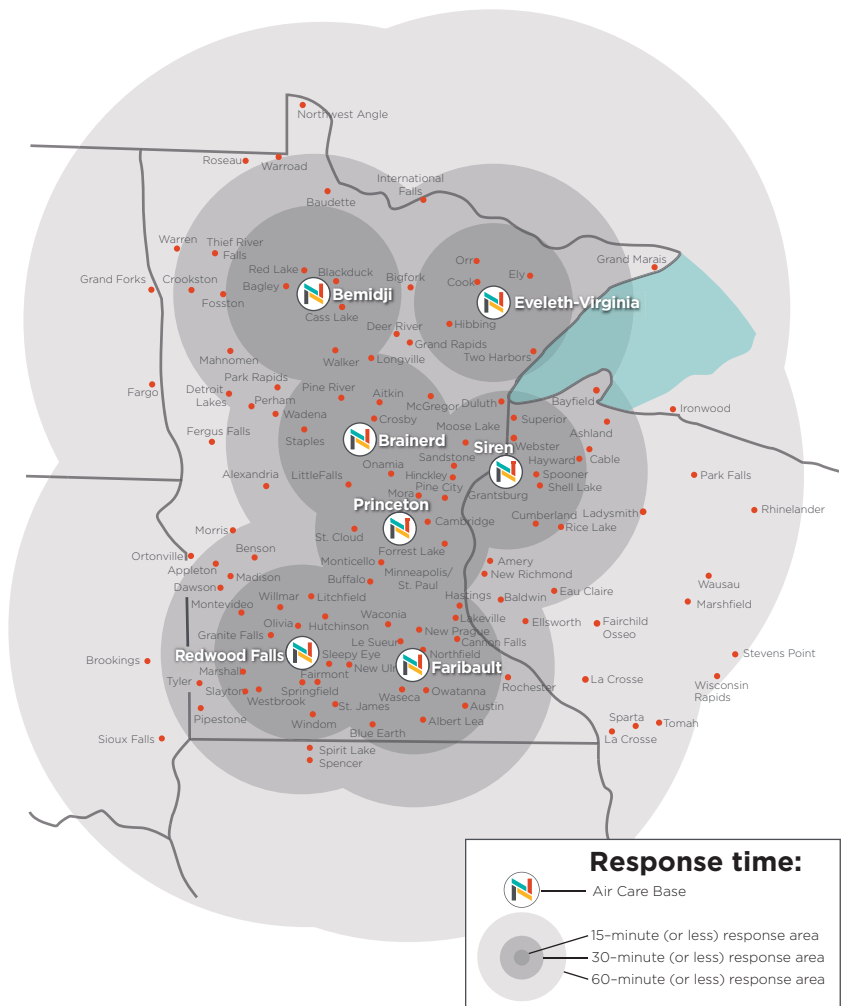

- 24/7 medical flight transportation from base locations in Bemidji, Brainerd, Eveleth-Virginia, Faribault, Princeton, Redwood Falls and Siren, Wisconsin
- Accredited by the National Accreditation Alliance Medical Transport Applications (NAAMTA)
- Advanced training opportunities for emergency care volunteers and professionals
- North Memorial Health Air Care owns and operates eight Agusta 109 helicopters, the fastest civilian helicopter on the market, which can reach speeds of 180 mph
- Specially-trained crew to provide the highest level of care for adult and pediatric customers
- Staffed by experienced, high-performance teams of nurses and paramedics who have years of critical care experience in high-volume intensive care units, emergency departments and ambulance services

Contact us:

To request Air Care medical transportation, call **1-800-247-0229**.

Ambulance Services

North Memorial Health Ambulance Services is licensed to provide every level of care from wheelchair to helicopter service.

In outstate regions, paramedics receive specialized critical transport training to allow them to handle many customers with complex medical conditions. This includes administering blood products, using ventilators and other technology to monitor and control oxygenation, and administration of medications.

Services

- 126 ambulances and 780 trained EMTs, paramedics, nurses and related support personnel who transport an average number of 85,000 customers annually
- Award-winning dispatch communication center
- EMS education
- IT support and administration
- Quality assurance
- Vehicle maintenance

Locations

North Memorial Health Ambulance Services has nine ambulance regions across Minnesota and western Wisconsin. Our service areas contain urban, rural and super rural communities.

- Brainerd, MN
 - Aitkin
 - Longville
- Douglas County (Alexandria), MN
- Faribault, MN

Genetics

The North Memorial Health genetics counseling program provides risk assessment and genetic testing services for families seeking information about their risk for cancer and cardiovascular disease and those with concerns related to childbirth and reproductive planning.

We understand each customer's situation and needs are unique. Our board-certified and licensed genetic counselors assess the likelihood that genetic factors play a role in a family history of cancer and inherited cardiomyopathies and arrhythmias. They also support families through the evaluation of potential fetal anomalies and coordinate care through pregnancy and the post-natal period.

If genetic testing is appropriate, our counselors will discuss the options, coordinate testing and meet with customers in person to review the results.

Cancer Services

- Annual genetics follow-up and surveillance programs
- Cancer panel genetic testing
- Genetic testing services
- Risk assessment

Cardiac Services

- Cardiac risk assessment from family and medical history information
- Education about the benefits and limitations of cardiac genetic testing
- Identification, referral and testing of at-risk family members
- Interpretation of genetic tests and disclosure of results
- Psychosocial counseling surrounding issues related to inherited cardiovascular diseases

Maternal Fetal Medicine Services

- Counseling to promote informed choices and adaptation to the risk or condition
- Education about inheritance, testing, management, prevention, resources and research
- Interpretation of family and medical histories to assess the chance of disease occurrence or recurrence
- Phone consultation for providers regarding genetics questions

Heart & Vascular

North Memorial Health Heart & Vascular provides comprehensive care across a broad range of accredited diagnostic, rehabilitative and comprehensive care programs, led by top-rated cardiologists and cardiothoracic surgeons.

North Memorial Health is the first hospital in Minnesota to receive full Heart Failure Accreditation from the American College of Cardiology for excellence in the care and management of heart failure, and the first and only hospital in Minnesota (eighth nationwide) to earn Chest Pain Center (CPC) with Primary PCI accreditation. We're the only hospital to have both accreditations.

Services

Cardiovascular Clinic Services

- Anticoagulation management
- Cardiac wellness and prevention
- Cardiologist consultations
- Congestive heart failure treatment
- Genetic testing
- Heart rhythm management
- Lipid management
- Pacemaker and defibrillator device management
- Peripheral artery disease diagnosis and treatment
- Varicose vein and spider vein diagnosis and treatment

Advanced Diagnostic Imaging Services

- Cardiac CT angiography
- Cardiac MRI
- Echocardiography
- Nuclear cardiology
- Stress testing
- Vascular ultrasound

Complex Heart Procedures & Interventional Services

- Angioplasty and coronary artery stent placement
- Atrial septal defect (ASD) and patent foramen ovale (PFO) closure
- Cardiac electrophysiology and ablation
- Emergency heart attack care (Heart Team STAT)
- Heart catheterization
- Implantable cardiac defibrillators
- Left atrial appendage closure device placement
- Pacemaker implants
- Peripheral angioplasty and stents
- Transcatheter Aortic Valve Replacement (TAVR)

Inpatient Cardiac Services

- Cardiac surgery – CABG, carotid surgery, AAA, complex aortic repairs
- Cardiothoracic surgery
- Cardiovascular critical care
- Surgical and Trans-femoral aortic valve replacement (SAVR and TAVR)

Lifestyle Management Services

- Cardiac rehabilitation
- Risk modification (nutrition counseling and behavior management)

Heart & Vascular

(continued)

Peripheral Artery Disease Treatment

Peripheral artery disease (PAD) is narrow, weak or blocked arteries outside of the heart and brain. PAD is usually the result of a buildup of fat and cholesterol, also called plaque, along the artery walls. North Memorial Health offers treatment for PAD to help reduce the risk of a heart attack, stroke or amputation including:

- Angioplasty
- Antiplatelet medicine
- Bypass surgery
- Exercise rehabilitation

Vein Program*

North Memorial Health offers vascular ultrasound screening for customers experiencing symptomatic varicose veins or venous insufficiency. If treatment is recommended, our intervention cardiologists use the latest technology and a variety of treatment options for quick relief without surgery including:

- Contrast venography
- Endovenous Laser Treatment (EVLT)
- Microphlebectomy
- Plethysmography
- Sclerotherapy
- Ultrasound screening
- VenaSeal™ closure system
- Venous duplex imaging

*Available at our Maple Grove, Minnetonka and Robbinsdale locations.

Maternal Fetal Medicine

North Memorial Health provides services for high-risk pregnancies including obstetrical care and fetal diagnosis. Our team consists of board-certified maternal fetal medicine physicians from M Health, registered diagnostic medical sonographers, board-certified genetics counselors and specially trained registered nurses.

Our physicians and staff provide medical consultation, counseling and education, diagnostic testing and procedural techniques tailored to the customer's unique health needs.

We partner with referring physicians and work to continue each customer's obstetric care with them whenever possible. We also coordinate care with neonatal experts when needed.

Conditions Treated

- Alloimmunization
- Complex maternal diseases
 - Cystic fibrosis
 - Diabetes
 - Heart disease
 - Hypertension
 - Infectious diseases
 - Kidney disease
 - Obesity
 - Rheumatologic disorders
- Fetal anomalies
- Fetal growth restriction
- Low or high amniotic fluid volume (oligohydramnios or polyhydramnios)
- Multiple gestation
- Placental complications
 - Morbidly adherent placenta
 - Placenta previa
 - Vasa previa
- Preeclampsia
- Previous obstetric problems
 - Cervical insufficiency
 - Miscarriage or recurrent pregnancy loss
 - Premature rupture of membranes
 - Preterm labor or delivery

Services

- 4D ultrasound
- Amniocentesis
- Aneuploidy screening (combined First Trimester Nuchal Translucency Screening, Non-invasive prenatal screening, Quad screen)
- Antenatal testing (biophysical profile, non-stress test)
- Doppler
- Fetal echocardiogram
- Genetic consultation
- Obstetric ultrasound
- Preconception consultation

Medication Therapy Management

North Memorial Health Medication Therapy Management (MTM) provides specially trained pharmacists to help customers master their medications.

During a face-to-face consultation, the customer and MTM pharmacist develop a care plan that is shared and agreed upon with their provider. The pharmacist will assess prescriptions, herbal supplements, vitamins and over-the-counter medications for medical necessity, effectiveness, safety and adherence.

MTM is an affordable service available to everyone and in most cases is provided at no charge through the customer's health benefit plan. Recommended referrals include:

- Adherence concerns
- Bariatric consultations
- Customers not meeting health goals
 - Asthma
 - COPD
 - Diabetes
 - Hyperlipidemia
 - Hypertension
 - Osteoporosis
- HIV drug interactions
- Inhaler and injectable consultations
- Medication cost consultations
- Medication side effects
- Opioid tapers
- Post hospitalizations
- Renal and hepatic dosing consultations
- Smoking cessation
- Transgender medicine
- Transitions of care

Neonatal Intensive Care

The North Memorial Health Neonatal Intensive Care Units (NICUs) at North Memorial Health Hospital and Maple Grove Hospital are both Level III NICUs and provide a high level of care for critically ill newborns – from admission through discharge.

Maple Grove Hospital can provide care to newborns who are born as early as 26 weeks of gestation. North Memorial Health Hospital can provide care to babies born as early as 24 weeks of gestation.

Services

- 24-hour coverage by University of Minnesota Physicians neonatologists
- Advanced respiratory support such as high-frequency ventilation and inhaled nitric oxide, for as long as required
- Breastfeeding education and support from certified lactation specialists
- Comprehensive care for extremely low birth weight infants
- Family-centered developmental care from birth of the critically ill neonate through discharge
- Multidisciplinary services: Social services, PT/OT and speech, lactation consultants, pharmacists, nutritionists and respiratory therapists
- Nearby neonatology follow-up clinic
- Neonatal nurse practitioners on-site 24/7
- Therapeutic hypothermia (body cooling) for hypoxic ischemic encephalopathy

Nephrology

North Memorial Health provides care to customers with chronic kidney disease, hypertension, diabetic kidney disease, kidney transplants, end stage renal disease (ESRD) and other kidney related diseases.

For kidney transplant customers, close monitoring and education regarding medications and possible complications helps them return to the most “normal” lifestyle possible. All customers followed by a Kidney Specialist of Minnesota nephrologist before a kidney transplant will transfer care to the Post-Transplant Clinic after their transplant.

The customer will be seen immediately after discharge from the hospital and then continue to be seen and followed in the clinic for as long as they have their transplant.

Services

- Dietitian consultation
- Hypertension consultation
- Renal transplant management
- Treatment options program classes

Neurology

Comprehensive Stroke Program

The North Memorial Health Neurology Comprehensive Stroke Program offers clinical care from diagnosis, treatment and hospital care, to customer and family education and support.

Our Comprehensive Stroke Program is certified at the highest level of accreditation by Det Norske Veritas (DNV), and ranks as one of the best comprehensive stroke centers in the nation. Since 2012, we have been recognized with the Gold Plus, Elite Plus Achievement Award from the American Stroke Association.

Services

- Acute inpatient rehabilitation unit, CARF certified
- Customer and community education about stroke risks and lifestyle changes to prevent strokes
- Inpatient and outpatient support and education groups for stroke survivors and their families
- Intensive Aphasia Program
- Mental health and addiction services
- Resource center that provides stroke education and support
- Serving hospitals in greater Minnesota, including TeleStroke
- Spasticity program with treatment options including oral medications, rehabilitation therapy, Chemo Denervation Therapy (Botox and other similar medications) and Intrathecal Baclofen Therapy/IBT

Neurology

Intensive Aphasia Program

North Memorial Health leads the way in stroke recovery. Our Intensive Aphasia Program (IAP) is an innovative outpatient program that includes many hours of intense therapy over the course of three weeks. It is one of only six IAP programs in the United States and the first in the region.

In this innovative program, customers participate in treatment sessions for three and a half hours a day, five days a week. After four weeks of therapy, they achieve an average gain of 13 percent (as measured by the Western Aphasia Battery) and are able to achieve similar results with repeated participation.

Services

- Occasional guest speakers and community outings
- One hour of group therapy directed by speech pathologist(s)
- One hour of therapy using computers and/or technologies
- One-on-one therapy with a speech language pathologist
- Thirty minutes of structured communication activities
- Weekly caregiver meetings

Neurology

Spasticity Clinic

North Memorial Health Spasticity Clinic works with customers affected by this motor disorder. Customer assessment and education are key parts of the program and help determine appropriate treatment options. The North Memorial Health spasticity team works closely with all those involved in providing stroke care, including physicians, nursing and rehabilitation staff.

Services

- Chemo Denervation Therapy
 - Botox and other similar medications are administered directly into the affected muscle to reduce spasticity
- Intrathecal Baclofen Therapy (IBT)
 - A treatment option that delivers baclofen directly to the central nervous system via the spinal canal using an implanted pump and catheter
- Oral medications
- Pump regulation
- Rehabilitation therapy
 - Occupational, speech and physical therapies including stretching and exercises
- Screening and assessment

Rehabilitation Therapy

Acute Inpatient Rehabilitation

Located in North Memorial Health Hospital, our 18-bed unit is often the first place post-stroke or injury customers begin formal rehabilitation. Our team of professionals includes rehabilitation nurses, physical therapists, occupational therapists, speech-language pathologists, neuropsychologists, social workers and interdenominational chaplains.

The program is accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF) and our inpatient rehabilitation services are offered to customers ages 14 or older.

Conditions Treated

- Brain injury
- Complex orthopedics/amputation
- Medically complex conditions
- Multiple sclerosis
- Multiple trauma
- Spinal cord injury
- Stroke

Location

North Memorial Health Hospital
3300 Oakdale Ave. N
Robbinsdale, MN 55422

If you have questions, please contact our rehabilitation evaluator at **(763) 581-8711** regarding our program and admission criteria.

We offer tours prior to admission to familiarize people with the program.

Rehabilitation Therapy

(continued)

Outpatient Rehabilitation

North Memorial Health's Outpatient Rehabilitation Therapy program offers a complete line of services tailored to meet our customers' unique recovery needs, including lymphedema therapy, balance and dizziness therapy, occupational therapy and speech pathology.

Conditions Treated

- Cleft palate (speech pathology)

Sleep Medicine

North Memorial Health Sleep Center provides board-certified specialists, with backgrounds in neurology, pulmonology and psychiatry, to evaluate, diagnose and treat all sleep disorders.

North Memorial Health is a Center of Excellence for Inspire Upper Airway Stimulation (UAS) - a new therapy approved by the FDA for treatment of moderate to severe obstructive sleep apnea in individuals who are not able to tolerate positive airway pressure (PAP) therapy.

Our Sleep Center is accredited through the American Academy of Sleep Medicine and offers a full scope of sleep testing, including laboratory-based polysomnography (PSG) and home sleep studies.

Conditions Treated

- Insomnia
- Narcolepsy and other disorders of excessive daytime sleepiness
- Parasomnias, including nocturnal seizures, sleep walking and other abnormal behaviors during sleep
- Restless legs syndrome and periodic limb movement disorder
- Sleep apnea

Services

- Clinical support and education
- Complimentary overnight wrist oximetry
- Day study for shift workers
- Follow-up care
- Home sleep studies

Urology

North Memorial Health treats the full spectrum of urologic conditions with the best techniques available. Our physicians pioneered fields such as cryotherapy for prostate cancer, microwave treatments for enlarged prostates and neobladders for bladder cancer. In addition, our urologists were some of the first surgeons in Minnesota to perform the Urolift Implant procedure to treat BPH.

Services/Conditions Treated

- Adrenal gland and bladder surgery
- Cancer care
- Clinical research
- Cryosurgery
- Hematuria
- High intensity focused ultrasound
- Infertility
- Kidney stones
- Kidney tumors
- Laparoscopic surgery
- Nephrectomy
- Nutritional supplements
- Pelvic pain
- Prostate and BPH
- Prostatectomy
- Pyeloplasty
- Robotic surgery
- Sexual health
- Uterine or vaginal vault prolapse treatment
- Vasectomy

Weight Management

There are many contributing factors to obesity - it is not just a result of eating too much or exercising too little. Our providers will carefully review your customer's medical history, consult with them about their weight loss goals and develop a lifestyle plan that makes sense for their body type. Treatment options may include diet and exercise, medication and/or surgery.

Services

- Bariatric surgery referral (if appropriate)*
- Body composition analysis
- Lab testing
- Medical history, lifestyle and medication review
- Weight loss medication prescription

For those customers who have tried other weight loss methods, North Memorial Health offers an integrated metabolic and bariatric surgery program that may be a suitable alternative. See **page 10** for more information.
