

Emergency Interventional Cardiology Workflow-COVID-19

Effective starting: February 9, 2022

Emergency = Proceduralist determines need to be performed as soon as possible; life threatening condition.

If patient tested positive for COVID-19 within the last 90 days, please do not re-test, unless clinical symptoms of re-infection are present.

Updates:
 -Added re-testing guidance-blue box
 -Updated document to reflect following urgent procedural workflow
