

**Cepheid Update 03/24/22**

<b>Clinical setting</b>	<b>Test</b>	<b>Isolation</b>
<b>COVID PUI admissions</b>	<b>COVID test panel—PUI (rapid test)</b>	<b>Full barrier</b>
<b>Non PUI admission (all areas except double occupancy or inpatient Behavioral Health Unit)</b>	<b>COVID test panel—Screening (non-rapid test)</b>	<b>Standard precautions with universal masking and eye protection, respirator for aerosol-generating procedures</b>
<b>Admitting to double occupancy room or inpatient Behavior Health Unit</b>	<b>COVID test panel-Screening (will be changed to rapid test by admitting)</b>	<b>Standard precautions with universal masking and eye protection, respirator for aerosol-generating procedures</b>
<b>PUI ED discharges</b>	<b>COVID test panel—Screening (non-rapid test)</b>	<b>Full barrier</b>
<b>Screening ED discharges</b>	<b>COVID test panel—Screening (non-rapid test)</b>	<b>Standard precautions with universal masking and eye protection, respirator for aerosol-generating procedures</b>
<b>Emergent / Urgent Procedural Care—PUI</b>	<b>COVID test panel– PUI (rapid test)</b>	<b>Full barrier until resulted</b>
<b>Emergent / Urgent Procedural Care—not PUI and fully vaccinated patient</b>	<b>COVID test panel– Screening (non-rapid test)</b>	<b>Standard precautions with universal masking and eye protection, respirator* for aerosol-generating procedures</b>
<b>Emergent / Urgent Procedural Care—not PUI and not vaccinated</b>	<b>COVID test panel– Screening (non-rapid test)</b>	<b>Full barrier until resulted</b>

*•For emergent/urgent procedural care/non-PUI: If a patient is documented to be fully vaccinated and is without any COVID-19 symptoms, it is recommended, but not required, team members wear a respirator during airway management or other AGP. If a patient is not fully vaccinated, team members are expected to wear full barrier protection.*

**Cepheid Update 03/24/22**

Revision	Description of Changes	Approvals	Date
5	Updated PPE/testing requirements for PUI admits considering increased Cepheid supply and use of rapid test for those populations. Combined top two lines to include OB. Erased NMHH ICU call out as that is covered in 'double room' workflow to change to rapid test by admitting.	IP Task Force	103/24/22
